

DRAFT

Environmental Implementation Guide for Radiological Survey Procedures

February 1997

U.S. Department of Energy
Assistant Secretary for Environment, Safety and Health
Washington, D.C. 20585

DRAFT

**Environmental Implementation Guide
for Radiological Survey Procedures**

Office of Environmental Policy and Assistance
Assistant Secretary for Environment, Safety, and Health
U.S. Department of Energy
Washington, D.C. 20581

Draft Report for Comment
February 1997

Prepared by the
Measurement Application and Development Group
of the
Health Sciences Research Division
of
Oak Ridge National Laboratory

TABLE OF CONTENTS

LIST OF FIGURES	vi
LIST OF TABLES	vi
ACKNOWLEDGMENTS	vii
Section 1. INTRODUCTION	1-1
1.1 PURPOSE AND SCOPE	1-1
1.2 INSTRUCTIONS FOR USE OF MANUAL	1-1
1.3 CRITERIA, GUIDELINES, AND UNITS OF MEASURE	1-5
1.3.1 Generic Guidelines	1-5
1.3.2 Derived (Site-specific) Limits	1-6
1.4 DATA QUALITY OBJECTIVES	1-7
Section 2. SITE ASSESSMENT PROCESS	2-1
2.1 IDENTIFICATION OF CANDIDATE SITE AND MATERIAL	2-1
2.2 PRELIMINARY INVESTIGATION	2-1
2.2.1 Purpose	2-1
2.2.2 History of Facility/Documentation	2-2
2.2.3 Present Use of Facility	2-3
2.3 SITE VISIT/INSPECTION	2-3
2.4 SUMMARY OF FINDINGS	2-4
Section 3. SURVEY PLANNING	3-1
3.1 SELECTION OF TYPE OF SURVEY	3-1
3.1.1 Scoping	3-1
3.1.2 Characterization	3-2
3.1.3 Remedial Action Support	3-2
3.1.4 Final Status	3-2
3.1.5 Confirmatory/Verification	3-2
3.2 SURVEY WORK PLAN	3-5
3.3 CONSENT FOR SURVEY	3-5
3.4 IMPLICATIONS OF HAZARDOUS SUBSTANCES AND MIXED WASTES	3-5
3.4.1 Unexpected Discovery or Suspicion of Hazardous Substances ..	3-7
3.4.2 Anticipated Finding of Hazardous Substances	3-8

3.4.3	Generation of Mixed Waste During Radiological Surveys	3-8
3.4.4	Remedial Actions and Mixed Waste	3-9
Section.4.	SURVEY PROCEDURES	4-1
4.1	SITE PREPARATION	4-1
4.1.1	Property Boundaries/Civil Survey	4-1
4.1.2	Clearing to Provide Access	4-1
4.1.3	Reference Grid System	4-3
4.2	GENERAL APPROACH	4-8
4.2.1	Scanning	4-8
4.2.2	Systematic Measurements and Sampling	4-10
4.2.3	Biased Measurements and Sampling	4-11
4.2.4	Systematic Sampling/Measurement Grid Frequency	4-11
4.3	RADIATION MEASUREMENTS	4-14
4.3.1	Alpha Measurements	4-15
4.3.2	Beta Measurements	4-16
4.3.3	Gamma Measurements	4-17
4.3.4	Subsurface Measurements (Subsurface Hole Logging)	4-18
4.4	SAMPLING	4-18
4.4.1	Removable Activity (Smears)	4-18
4.4.2	Soil	4-19
4.4.3	Water	4-21
4.4.4	Air	4-21
4.4.5	Radon	4-22
4.4.6	Miscellaneous	4-23
4.5	BACKGROUND MEASUREMENTS	4-23
4.6	SURVEY OF EQUIPMENT AND SMALL ITEMS	4-28
Section 5.	RADIATION DETECTORS AND INSTRUMENTATION	5-1
5.1	RADIATION DETECTORS	5-1
5.2	DISPLAY AND RECORDING EQUIPMENT	5-5
5.3	DETECTION SENSITIVITY	5-5
5.3.1	Static Counting Sensitivity	5-6
5.3.2	Scanning Sensitivity	5-12
5.4	APPLICATIONS	5-15
5.5	INSTRUMENT CALIBRATION AND RESPONSE CHECK	5-17
5.6	RADON AND THORON DETECTION	5-18
5.6.1	Sampling Methods	5-20
5.6.2	Direct Measurement of Radon	5-21
5.6.3	Radon Progeny Measurements	5-22
5.6.4	Measurement of Radon Flux	5-23
5.7	SPECIAL EQUIPMENT	5-23
5.7.1	Mobile Systems (Vehicle-Based)	5-24

5.7.2	Positioning Systems	5-24
5.7.3	Ground-Penetrating Radar and Magnetometry	5-24
5.7.4	Aerial Radiological Surveys	5-25
Section 6. LABORATORY METHODS AND INSTRUMENTATION		6-1
6.1	INTRODUCTION	6-1
6.1.1	Prior Considerations	6-1
6.1.2	Data Quality Objectives	6-1
6.2	SAMPLE PREPARATION	6-2
6.2.1	Soil and Sediment	6-2
6.2.2	Water	6-2
6.3	ANALYTICAL PROCEDURES	6-3
6.3.1	Analysis of Smears	6-3
6.3.2	Analysis of Soil and Sediment	6-5
6.4	ANALYSIS OF WATER	6-7
Section 7. INTERPRETATION OF SURVEY RESULTS		7-1
7.1	DATA CONVERSION	7-1
7.1.1	Surface Activity	7-2
7.1.2	Soil Radionuclide Concentration	7-3
7.1.3	External Exposure Rate and Dose Equivalent Rate	7-4
7.2	MEASUREMENT UNCERTAINTY	7-4
7.2.1	Systematic and Random Uncertainties	7-5
7.2.2	Statistical Counting Uncertainty	7-6
7.2.3	Uncertainty Propagation	7-6
7.2.4	Reporting Confidence Intervals	7-7
7.3	DETECTION SENSITIVITIES	7-9
7.4	FORMAT FOR DATA PRESENTATION	7-10
7.5	DIRECT COMPARISON OF SURVEY UNIT RESULTS WITH GUIDELINE VALUES	7-11
7.5.1	Calculating Average Levels	7-12
7.5.2	Removable Activity	7-12
7.5.3	Areas of Elevated Activity	7-12
7.5.4	Exposure Rates	7-14
7.6	STATISTICAL TESTS	7-14
7.6.1	Preparing Data Sets from Sample and Measurement Results	7-14
7.6.2	Comparisons When Data are Normally Distributed and Background is a Known Constant	7-17
7.6.3	Nonparametric Upper 95% Confidence Limit Test	7-19
7.6.4	Comparing Survey-Unit Data with Background Data	7-20
7.7	EVALUATING RESULTS RELATIVE TO DATA QUALITY OBJECTIVES	7-22

Section 8. DATA REPORTING AND MANAGEMENT	8-1
8.1 FIELD DATA	8-1
8.2 DATA REPORTING	8-1
Section 9. QUALITY ASSURANCE	9-1
9.1 QUALITY ASSURANCE PROGRAM	9-1
9.2 ORGANIZATION	9-2
9.3 PERSONNEL REQUIREMENTS	9-3
9.3.1 Qualifications	9-3
9.3.2 Training	9-3
9.4 QUALITY IMPROVEMENT	9-3
9.5 CONTROL OF RECORDS AND DATA	9-3
9.6 WORK PROCESSES	9-4
9.6.1 Instructions and Procedures	9-4
9.6.2 Data Quality Objectives	9-4
9.6.3 Field Quality	9-4
9.7 CONTROL OF MEASURING AND TEST EQUIPMENT	9-6
9.8 DATA VALIDATION	9-6
9.9 DESIGN	9-7
9.10 PROCUREMENT CONTROL	9-7
9.10.1 Procurement Documents	9-7
9.10.2 Direct Purchasing	9-8
9.10.3 Subcontracts	9-8
9.10.4 Control of Nonconforming Items	9-8
9.11 INSPECTION AND ACCEPTANCE TESTING	9-8
9.12 MANAGEMENT ASSESSMENT	9-9
9.13 AUDITS	9-9
9.13.1 Surveillances	9-9
9.13.2 Internal Audits	9-10
9.13.3 External Audits	9-10
9.13.4 Corrective Actions	9-10
9.14 INDEPENDENT ASSESSMENT	9-10
Section 10. DEFINITIONS AND TERMINOLOGY	10-1
10.1 DEFINITIONS	10-1
10.2 ABBREVIATIONS	10-9
10.3 ACRONYMS	10-10
REFERENCES	R-1
APPENDIX A APPLICABLE GUIDELINES FOR PROTECTION AGAINST RADIATION	

APPENDIX B CALCULATIONS FOR DETECTION PROBABILITIES

APPENDIX C NON-PARAMETRIC TEST WHEN THE BACKGROUND VALUE
IS NOT PRECISELY KNOWN

LIST OF FIGURES

1.1	Site Assessment Flowchart	1-2
1.2	Requirement Matrix For Radiological Surveys	1-3 & 1-4
4.1	Typical grid layout with alphanumeric grid block designation	4-5
4.2	Example of grid system for survey of site grounds using compass directions	4-6
4.3	Example of grid system for survey of site grounds using compass direction	4-7
4.4	Example survey procedure flow for survey of equipment & small items	4-29
4.5	General process for surveys for release or characterization of non-real property	4-31
5.1	Graphically represented probabilities for Type I and Type II errors in detection sensitivity for instrumentation with a background response	5-7
7.1	Example site illustrating the necessity for weighted averaging of sample results	7-16

LIST OF TABLES

4.1	Table 4.1. Grid size required to detect contaminated circular spots at varying confidence levels	4-12
4.2	Factors of $t_{90\%}$ and $t_{95\%}$ for comparison of survey data with guidelines	4-27
5.1.	Radiation detectors with applications to alpha surveys	5-2
5.2.	Radiation detectors with applications to beta surveys	5-3
5.3.	Radiation detectors with applications to gamma surveys	5-4
5.4	Examples of estimated detection sensitivities for alpha and beta survey instrumentation	5-11
5.5	Probability of detecting 300 dpm/100 cm ² of alpha activity while scanning with alpha detectors using an audible output	5-15
6.1	Typical measurement sensitivities for laboratory radiometric procedures	6-4
7.1	Areas under various intervals about the mean, $\bar{\mu}$, of a normal distribution with a standard deviation σ	7-8
7.2.	Factors u for conducting the nonparametric 95% upper confidence limit test (Sect. 7.5.6) for number of samples (n) from 1 to 150	7-21

ACKNOWLEDGMENTS

The Measurement Applications and Development (MAD) Group at the Oak Ridge National Laboratory was the primary technical support contractor for this project. Woodrow D. Cottrell contributed significantly to the initial planning, technical content, and development of the manual. His experience and technical expertise in environmental radiological assessments formed the basis for the first draft of the manual. This project was conducted under the general supervision of Richard E. Swaja, Head of the Assessment Technology Section. ORNL/MAD staff who coordinated the text preparation, manual development, and information integration for this effort included Robert L. Coleman, John K. Williams, and Romance F. Carrier. Other ORNL/MAD staff members who provided literary and technical reviews and prepared text for portions of the document included Ray D. Foley, Richard A. Mathis, Michael E. Murray, Debbie A. Roberts, Richard E. Rodriguez, and Fred Baes. Graphics were prepared by Tony R. Stewart of the ORNL/MAD Group. The technical contributions of Richard O. Gilbert of the Pacific Northwest Laboratory and James D. Berger of Auxier and Associates are also acknowledged.

Funding and project direction were provided by the Air, Water, and Radiation Division of the Department of Energy's Office of Environmental Policy and Assistance (EH-41). The contributions of Andrew Wallo III and Harold T. Peterson in areas associated with program management, technical oversight, and project coordination are gratefully acknowledged. Robert Baker also provided technical assistance under subcontract to DOE.
